

LOCKHEED MARTIN

Facilities Engineering - Owego NY

Dear Mike,

Lockheed Martin MST-Owego has worked side by side with J&J Sheet Metal Works on countless construction projects from small to large. They have proven to be a valuable resource in the design build arena, and finding cost effective solutions to meet challenging budgets. Their level of professionalism and industry knowledge has made their business excel in every aspect, from plan and spec projects, to design build and full service repairs.

In addition to their construction experience and our work together as subcontractors, they have replaced and repaired several pieces of heating / cooling equipment and air distribution systems in our facility. They have proven to be a very honest and reasonable contractor. I would personally recommend J&J Sheet Metal Works to any general contractor or private building owner. We believe that having your company as part of the project team is a great asset to us.

Please continue the good work; I look forward to working on many more projects with you and the members of your company.

Sincerely,

Sobie Chandrica
